The Company

Constas Shipping Agency is a family-owned, third-generation shipping agency company with a century of experience in the shipping industry.

CSA offers a full range of shipping agency services, including chartering and freight forwarding.

When you choose to work with us, you can count on expertise, professionalism, quality, loyalty, efficiency, and exceptional customer service, all at competitive rates.

Throughout the years, CSA has built a strong reputation as one of the leading agencies in Piraeus, Greece.

Our dedicated team is equipped to handle any challenge, expertly managing all types of vessels with the skill and experience that our clients—owners, charterers, and traders—demand.

Our Mission

The mission of CSA is to deliver high-quality agency services promptly and cost-effectively, ensuring the complete protection of the interests of all vessels visiting Greek ports.

Our team tailors its approach to meet the unique requirements of each client, ensuring owners satisfaction.

We strive to instill a sense of security and confidence in our principals—whether they are owners, charterers, or traders—by maintaining open lines of communication throughout the entire duration of each vessel's call.

The most recent projects we are proud of

2020 - 2021 CRETE - PELOPONNESE INTERCONNECTION PROJECT.

In 2020, Conostas Shipping Agency was designated as the Central Agency for the Crete-Peloponnese interconnection project.

This involved the design, supply, and installation of a system comprising 150kV submarine XLPE ER cables to connect Crete with the Greek Electricity Transmission System.

As full agents for the high-voltage subsea cable project, we were authorized to obtain necessary permissions from the Ministry of Mercantile Marine and the Greek Independent Electricity Transmission Operator (IPTO) SA. Our contract included securing appropriate berths at the Perama repair zone and facilitating the smooth berthing of Jan De Null's vessels, "ISAAC NEWTON" and "DANIEL BERNOULLI," for their mobilization and demobilization.

We also took charge of organizing local subcontractors and workshops, overseeing the complete mobilization and demobilization of both vessels during their stay at Perama. Our responsibilities extended to arranging crew changes for at least 20 crew members weekly, including transportation from the airport, accommodation, PCR tests at local clinics, and onboard visits. A critical aspect of our role was managing the import and export of all necessary equipment for the project, collaborating with various suppliers across Europe to coordinate transport by sea and road, and handling customs clearance for both temporary and permanent imports, including the 80 km long high-voltage cable.

The most recent projects we are proud of

The Crete – Peloponnese Interconnection (cont.)

Following the completion of mobilization and demobilization at Perama, we continued to serve as full agents in Nopigia, Crete, where the first phase of the cable installation began. We arranged accommodation for the JDN crew and subcontractors, managed crew changes, and facilitated the transport of heavy equipment such as winches and cable containers. During the cabling process, we coordinated crew embarkation and disembarkation via tugboats at designated coordinates provided by the Master of the Isaac Newton. Additionally, we provided tugs to assist the Isaac Newton during cabling operations and informed nearby vessels of the ongoing project. As the vessel approached the Peloponnese site (NEAPOLIS), we coordinated the demobilization of equipment and staff from Crete to the new project site.

The most recent projects we are proud of

OSM

We are proud to have worked with OSM, acting as agents for their managed vessels at both the PCT terminal and Thessaloniki terminal. Our partnership began in 2016 with container vessels such as MAX SUPPORTER, MAX CARRIER, MAX CAVALIER, MAX PRIDE, MAX STABILITY, and MAX PRODUCER, concluding in 2021 when their contract was transferred to another party. In addition to the agency agreement for these vessels, we also managed spare parts, supplies, logistics, crew changes, repairs, provisions, crew boat assistance, and tug services at both Thessaloniki and Piraeus, effectively serving as the primary supplier at these ports.

LUNDQVIST

Additionally, we maintain a long-term relationship with LUNDQVIST, the owners of Aframax vessels that frequently call at the Aspropyrgos refinery port and Pachi oil terminal for crude oil discharging. Acting as both owners' and charterers' agents, we provide comprehensive agency services for their vessels at both ports, including crew changes, fresh water supply, spare parts imports/exports, tug assistance, crew handling services, and transpositions.

The most recent projects we are proud of

Among the Projects that have being assigned to us during these years of expertise are as follows:

- ✓ The Rion - Antirion Bridge Project 1997 – 2004 – Acting as agents
- ✓ The Piraeus – Psytalleia Island Sewage Treatment Plant Project (RAMOND ATHENA ATBE TE) 1994-2007 – Acting as Agents
- ✓ The Piraeus Port Berths Extension 1985 – 1995 – Acting as Agents

A Team made for Success

Great service is all about building relationships of trust.

At Conostas Shipping Agency, we believe that great service is all about forging strong relationships built on trust! We see our clients as part of our family, and we treat them with the utmost care and respect.

All projects are completed efficiently and on schedule. But most importantly all our clients consider us their most valuable ally.
